

Workshop Info

One of the two workshops - "**USE OF DIATOMS IN FORENSIC SCIENCE**" - is planned for **Monday, 8 September 2008**. Moderators will be **Stefan Uitdehaag** (Netherlands Forensic Institute, The Hague) and **Herman van Dam** (Consultancy for Water and Nature, Amsterdam, www.waternatuur.nl).

The goal of the workshop will be to get an overview of the persons who are active in this field of research and the kind of projects that are done by these colleagues. The aim is to identify topics for background research and discuss how this research can be done in future.

All participants who are interested to contribute in this workshop are kindly requested to contact directly Dr. Herman van Dam (herman.vandam@waternatuur.nl), preferably prior to August 25.

Thank you in advance!

Dubrovnik, August 1, 2008.
